

## Advanced Office Password Recovery 4.14

Jumat, 18 Desember 2009 - by : [admin](#)

Advanced Office Password Recovery (or AOPR for short) is a program designed to recover the forgotten or lost passwords to the files/documents created in Microsoft Office applications (all versions up to Office 2003): Word, Excel, Access (including user-level passwords and owner info), Outlook, Project, Money, PowerPoint, Visio, Publisher, OneNote, Backup, Schedule+, Mail.

Can also reset MS Internet Explorer (3/4/5) Content Advisor password, and open password-protected VBA projects (created in any application) via the "backdoor". Most passwords are being recovered instantly; the "password to open" in Word/Excel 97/2000/XP/2003 can be recovered using "brute-force" and dictionary attacks, effectively optimized for speed.

There are three editions of AOPR: Home, Standard and Professional. Home edition can recover passwords to Microsoft Word and Excel documents only (all but VBA Project passwords). Standard edition is also able to recover/remove Word and Excel VBA Project passwords, can unlock protected Excel add-ins (XLA), recover "password to open" to Access MDB files, and supports all Outlook passwords.

Professional edition is the most complete solution that recover all passwords for all Microsoft Office components and a few other Microsoft products, including Access user-level passwords and ownership information, Microsoft Project, PowerPoint, OneNote, Money and much more.

Here are some key features of "Advanced Office Password Recovery Home":

Microsoft Word (versions: 2.0, 6.0, Word 95, Word 97, Word 2000, Word XP, Word 2003)

- Password to Open
- Password to Modify
- Document Protection Password
- VBA Project Password

Microsoft Excel (versions: 3.0, 4.0, Excel 95, Excel 97, Excel 2000, Excel XP, Excel 2003)

- Password to Open
- Password to Modify
- Workbook Password
- Shared Workbook Password
- Sheet Passwords

Requirements:

- about 5 MB of free space on hard disk
